

Tonneau Cover Fitting Instructions

**Toyota Hilux Dual Cab
With Factory Sports Bars
(Genuine Hardware Fitted)**

October 2015 - Current

Part number: ATC01343

Package includes

1 x Tonneau Cover

1 x Fitting Instruction

NB: This item is tonneau cover only.

TONNEAU COVER FITTING

- (a) Support Bars must be placed in high bracket for initial fitment.
- (b) Attach the plastic “J” Retainer, on the front of the Tonneau Cover, to the front of “C” channel ropetrack, located behind the cab window.
- (c) Pull the cover under the sports bar and drape the cover across the tub.
- (d) Clip the side plastics under the aluminium profile first using the pull loops in the corners to stretch the cover. Ensure that the cover sits above the plastic base of the bar (rear only).
- (e) Clip the plastic on the tailgate under the aluminium profile last.

NOTE: You can adjust your tonneau, if it is too tight, by lowering the height of your tonneau support bars.
